## Dando Mule ATV5-RC

The Dando Mule ATV5-RC is a brand new concept from Dando Drilling International. With every drilling and construction operation there is a need to move equipment and materials across rough terrain in a safe and cost effective way.

Made in England  
since 1867

# Dando Mule ATV5-RC

## Specification

The design of the machine allows the Mule to be operated from a distance by remote control thus keeping the operator safe. The removal of the operator from within the vehicle also makes for a much lighter machine as well as an increased payload capacity - the machine is available in 3 ton or 5 ton load capacity.

The highly manoeuvrable and agile crawler carrier comes with various track options including steel and rubber tracks and is self loading/unloading with a demountable load bed which comes in either a standard length of 3 metres or extended at 3.6 metres. Finally the compact design of the machine allows it to fit into a standard shipping container making it easy for transportation.

## Key Features & Options

- Track laying highly manoeuvrable vehicle
- Turns within own length
- Sized to fit within a standard shipping container
- Remote control (with manual and umbilical backup)
- Maximum payload 3 to 5 ton dependent upon specification
- Removable load beds in standard 3m and extended 3.6m lengths
- Specialist load bed configurations available (fuel bowser, pipe carrier, etc)
- Self-loading/unloading
- Multiple track options
- Twin speed tracking
- Remote start/stop
